## **SECTION D – SKILL DESCRIPTIONS (See Special Olympics, Inc. Rules)**

### **Safety Considerations**

Consistent with the Special Olympics philosophy that the movement is athlete- centered, the safety of athletes is the primary concern when establishing sports rules. The establishment of international guidelines for Special Olympics gymnastics compulsory and optional routines will ensure that the athletes follow a proper progression of instruction in gymnastics skills. This will reduce the incidence of injuries. Athletes who safely perform all skills in a specific level of compulsory routines should compete at that level. Competition in optional routines has been limited to advanced-level gymnasts only.

Learning the proper progressions of skill instruction and correct spotting techniques is the responsibility of the gymnastics coach. Special Olympics commends those national/state Programs in which certified gymnastics instructors use the proper progression for teaching advanced gymnastics skills which is set forth in the Gymnastic Coaching Guide, these rules and elsewhere.

Many volunteers begin coaching with limited gymnastics expertise. These volunteers should start by teaching only the basic skills and routines. Those skills that are included in the more advanced levels should be taught by coaches with at least two years of mainstream artistic gymnastics coaching experience. It is recommended that coaches of advanced Levels 3 and 4 gymnasts have additional training in gymnastics from the National Governing Body for gymnastics in their country.

Regardless of how much safety is provided, coaches should not entice or encourage their athletes to perform skills that are beyond their reasonable ability or skills that are beyond the coaches' ability to teach. Special Olympics recommends that all gymnastics coaches become safety certified in accordance with the policy endorsed by the appropriate National Governing Body. Special Olympics concurs with the following responsibility statement:

“Even though gymnastics safety is everyone’s responsibility, the instructor or coach must bear much of it, including the responsibility to see that others do their share: the parents, the doctor and the athletes. Prevention and remediation are major responsibilities in a broad umbrella-type program under which many other points must be included: the environment, the prescribed learning progression and the physical preparedness of the athlete. These are the areas where the instructor/coach bears much of the moral and legal responsibility. It is not enough to warn and inform; all concerned must have an appreciation and understanding of the risk in every vigorous gymnastics activity.”

As shown on the video and written in the text, coaches must be in a position to spot on vault, uneven bars, and high beam before an athlete may compete in these events. The coach must remain in the remain there during the routine. The gymnast will be stopped and will receive deductions if the coach is not in the spotting position for the routine. Refer to the Judges Guide.
